Source: Rocq Capital Management Limited / JP Morgan / Bloomberg. Prior to 11th October 2017, Rocq Capital Balanced Fund was known as Omnium Sterling Multi-Asset Fund.

Approach and style

The Fund aims to generate capital appreciation in the medium to long term by investing in a variety of asset classes. The Fund utilises a top down approach to asset allocation and will invest across a range of asset classes through funds and a wide universe of equity and bond markets. The Fund will benefit from an experienced investment committee who will use a variety of research sources and views to construct the portfolio.

Commentary

Inflation continued to run strong in August, with US CPI coming in at 5.4% year-on-year, although certain sectors that have been strong in recent months (e.g. autos) started to fade, whilst labour costs rose. Job growth continued apace and the Fed remains prepared to 'taper' (reduce quantitative easing) sometime around the turn of the year. Interest rate rises appear somewhat further down the line though.

In the UK, COVID related restrictions were lifted mid month, which propelled domestic equities higher (FTSE 250 +5.3%). Emerging Markets were again driven by the Chinese government intervening in markets, with equities falling sharply at the start of the month before recovering strongly into month end.

Whilst the delta variant of coronavirus remains a risk, particularly in areas with low vaccination rates, others with higher vaccination rates (e.g. UK and Europe) remain on a strong road to recovery.

Bond yields remain low, although sovereign yields backed up slightly during the month, and credit spreads widened as investors moved into riskier assets including high yield. Low bond yields continued to support the resurgence of growth stocks after a wobble earlier in the year.

Emerging Market Equities was the top performing sector at +5.3%. Aubrey recovered strongly and gained 7.8% with their large exposure to India particularly profitable as the broad market was up over 9% and key holdings including Apollo Hospitals gaining over 23%.

Developed Market Equities were also strong at +3.3%. UK exposure led the way and gained over 5% on average. Quality growth equities also performed strongly with Comgest +3.6%, Edgewood +3.7% and Granahan +4.3%. The more value focussed Guinness (+2.9%) and Lazard Global Listed Infrastructure (+0.5%) also made positive contributions.

Alternatives gained +0.9% with JPM Global Core Real Assets gaining 2.2% and Western Asset Macro Opportunities taking advantage of the moves in bond markets to return +1.5%. The systematic trading strategies of MW TOPS and Crabel Gemini made small gains.

In **fixed income**, crossover and high yield credits were easily the top performers at +2.1% and +2.7% respectively. Investment grade credits made small positive gains whilst the position in UK Gilts fell 0.7%.

Risk and reward profile

The risk and reward category was calculated using historical performance data and it may not be a reliable indicator of the Fund's future risk profile. The risk and reward category shown is not guaranteed to remain unchanged and the categorisation may shift over time. The lowest category does not mean a risk-free investment. The investments of the Fund are subject to normal market fluctuation and other risks inherent in investing in securities and there can be no assurance of capital appreciation. The value of investments and income from them, and therefore the value of the units may go down as well as up and an investor may not get back the original amount invested.

LOWER RISK, TYPICALLY LOWER REWARDS

Disclaimer

Returns are quoted net of all fees, including; investment management, custody, administration, audit and directors' fees. The overall ongoing charges will be capped at 1.75%.
