Source: Rocq Capital Management Limited / JP Morgan / Bloomberg. Please see Disclaimer for important information regarding the track record. Prior to 11th October 2017, Rocq Capital Growth Fund was known as Omnium Sterling Growth Fund.

Approach and style

The Fund aims to generate substantial capital growth in the medium to long term by investing in a variety of asset classes. The Fund utilises a top down approach to asset allocation and will invest across a range of asset classes through funds and a wide universe of equity and bond markets. It is intended that the fund will typically be significantly exposed to equity markets raising its risk profile and making it most suitable for a long term investment. The Fund will benefit from an experienced investment committee who will use a variety of research sources and views to construct the portfolio.

Commentary

Equities ended the year strongly amidst as 'Santa Rally' as reported earnings came in generally strong and sentiment improved as fears over the severity of the 'Omicron' variant of COVID-19 subsided. US markets (S&P 500) rose 4.5%, taking returns for the year to just shy of 30%. The ride wasn't quite so enjoyable for some of the smaller, as yet unprofitable, high growth companies, where increasing discount rates and concerns over future growth saw many fall back dramatically. European equities performed strongly as well, despite the Omicron surge in COVID cases.

Emerging markets were also strongly positive although China's mega cap technology stocks remain under pressure as investors try to understand possible government interventions and regulations.

Inflationary tensions, driven primarily by pandemic shutdowns, and central banks threatening to move to a less accommodative stance, drove government bond yields higher although credit spread tightening supported riskier assets; those securities with the biggest credit spread margin generally did best.

Within the fund, **Alternatives** returned +2.0% as

Western Asset's active trading strategy took advantage of the volatility in bond markets.

Developed Market Equities returned +2.3% as a generally very strong month was hampered by some of the high growth positions selling off. Edgewood US Growth (-0.8%) in the large cap space and Granahan US Focused Growth (-11.4%) in the small cap space, hurting performance. Elsewhere, Lazard Global Franchise benefited from the demand for more value oriented assets (+5.8%) whilst UK smaller companies (Montanaro UK Income +4.1%, Polar UK Value Opportunities +5.1%) also performed well. A position in Artemis Positive Future was opened with the proceeds from a sale of Ardevora UK Equity.

In **Emerging Markets**, Aubrey's Chinese exposure caught a cold after the mega cap technology names sold off there, falling 4.6% whilst First Trust's value and commodity exposure performed well at +4.1%.

Fixed Income made a small positive contribution with higher yielding credits gaining from the credit spread tightening. Nordea European High Yield (+1.2%) was the top performer.

Risk and reward profile

The risk and reward category was calculated using historical performance data and it may not be a reliable indicator of the Fund's future risk profile. The risk and reward category shown is not guaranteed to remain unchanged and the categorisation may shift over time. The lowest category does not mean a risk-free investment. The investments of the Fund are subject to normal market fluctuation and other risks inherent in investing in securities and there can be no assurance of capital appreciation. The value of investments and income from them, and therefore the value of the units may go down as well as up and an investor may not get back the original amount invested.

LOWER RISK, TYPICALLY LOWER REWARDS

HIGHER RISK, TYPICALLY HIGHER REWARDS
