Cautious Strategy

Factsheet

ROCQ CAPITAL
CAUTIOUS

Background

A multi-asset portfolio blending bonds, equities and selected alternatives to deliver steady, controlled growth. Designed for investors with a lower tolerance for risk, this portfolio seeks to generate consistent long-term returns above inflation while carefully managing volatility.

Philosophy

We believe in careful research, robust risk management and straightforward communication.

As an independent firm, we select all investments solely on their merits and contribution to portfolio outcomes.

Investment Process

1. **Macro-Economic Analysis**
   An evaluation of the broad economic conditions shaping our investment environment, moving from global analysis to regions and sectors.
2. **Strategic Asset Allocation**
   Longer-term allocations in equities, bonds or credit and alternatives across our strategies, reviewed periodically or when structural changes occur within markets.
3. **Tactical Allocation**
   Short to medium term portfolio adjustments implemented when opportunities present themselves.
4. **Portfolio Construction**
   The careful structuring of portfolios to achieve an appropriate balance between risk and reward, aligned with clients' risk tolerances.
5. **Investment Selection**
   Thorough analysis and continuous review of investments across broad and specialist groups.
   Our aim is to ensure each investment remains highly competitive within its category and complements overall portfolio construction.

Asset Class: Multi Asset

Base Currency: GBP

Target Return: Cash + 2% to 4%

Horizon: 5 Years +

Risk: Lower

Minimum Investment: £10,000

Liquidity

The majority of holdings offer daily liquidity, although a small number may trade weekly. We only invest in strategies where the underlying asset pool provides an appropriate level of liquidity.

Investment Team
